Creating Beautiful Smiles

“ Straight teeth can help you eat, speak, smile and socialise with confidence. ”

Quick Straight Teeth®

My patients LOVE Quick Straight Teeth. The beautiful ceramic brackets blend in with the teeth, the treatments are relatively quick and more comfortable than people expect.

This is why my top recommendation to patients wanting straighter teeth, and a beautiful smile, is Quick Straight Teeth braces.

What is QST?

Quick Straight Teeth uses fixed or removable braces to gently straighten and align the front 6 or 8 teeth, basically, the teeth that are visible when you smile.

Why Quick Straight Teeth

1/2

Nearly half of all adults are embarrassed by their teeth. Most won't seek a solution believing it to be uncomfortable, time consuming, unattractive and expensive.

Quick Straight Teeth®

Quick Straight Teeth overcomes these four fears

A system of fixed or removable braces that are comfortable, quick, aesthetic and relatively inexpensive.

Quick Straight Teeth

Quick Straight Teeth has been designed by orthodontic specialists, to be used by general dentists.

Our unique approach ensures comfortable treatment, near invisible appliances and predictable results.

Quick Straight Teeth®

Quick Straight Teeth Fixed Braces

Our fixed braces use 3M Gemini Clear brackets and tooth-coloured wires.

These are made of beautiful poly-crystalline ceramics that blend in with your natural tooth colour.

What makes Quick Straight Teeth better for patients?

Cost

Due to low laboratory fees and quick treatment times, Quick Straight Teeth invisible braces are one of the most cost-effective systems available.

Appearance

Our braces are tooth-coloured and are nearly invisible in the mouth, so you can get straight teeth without the ‘Ugly Betty’ look.

Time

Getting straight teeth, and a beautiful smile is fast! Treatments for teeth straightening take between 4 and 24 weeks depending on complexity.

Discomfort

Our braces have been designed to ensure maximum comfort for patients. Not only will they look discreet, they’ll feel great too!

So, is QST the best orthodontic system in the world?

See what dentists have to say...

Edward Li

QST has packaged simple orthodontics from head to toe. The choice of materials, supply of equipment, good communication, and speed from the labs has made working with QST smooth and predictable. The 3M Gemini brackets are fantastic, and if your patients can afford it, the Clarity ones are simply excellent. Our patients don't complain about ulcers and they are always surprised about how discreet the brackets are. Working with both clear aligners and fixed braces, I have come to prefer fixed appliances for ease of use in bonding and the speed of treatment over clear aligners. The use of QST in my clinic means that our restorative work is more conservative and minimally-invasive, allowing us to preserve healthy enamel, improving gingival margins and correct the arch-form that used to complicate cosmetic treatments. There is much more to learn and I look forward to new developments in teaching and protection of general practitioners like myself so we can achieve great results for the right cases and continue to be safe doing so.

Why do you do dentistry?

This is a question I think all of us should reflect upon. It is our own 'why' that gets us up every morning and helps us to enjoy our work. Very early on in my career I found my 'why' – I wanted to help design, build and improve smiles. I wanted people to come to me and leave healthier, happier and more confident. QST has been essential for helping me to meet my 'why' and it has become an integral part of my practice over the past few years, enabling me to offer a range of orthodontic possibilities to my patients. These options have allowed me to cosmetically enhance my patients' smiles in a safe and cost-effective way, giving them results that they love and are proud of. I have even used QST to treat my mum! The QST components are top quality and the support from the specialist-led team and orthodontic-only laboratory are second to none.I would whole-heartedly recommend QST to any of my colleagues.

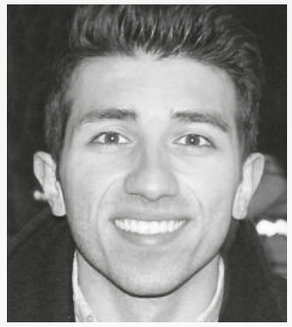
I must say, I have found them to be a great company to work with.



Sia Lord

A total game changer! Phenomenal company, beautiful high grade products, amazing support and unbelievable prices. Would definitely recommend this company to anyone.

Vinnie Thandi

The support from QST is the biggest thing - they are a great company and lovely to work with.

Daniel Cheung

My experience of QST has been incredible. The quality is the best thing about it. The support I get from the specialist team and the lab is second to none.

Neil Banton

I am very happy with the system, and the training has been excellent.

Case studies

This lady was particularly unhappy with the upper tooth that was stuck on the inside and the general crowding of her front teeth. She had a QST fixed brace for 6 months and she loves the result!

This individual disliked two teeth that were biting the wrong way around. She wore a QST fixed brace to correct her bite over a period of four months. During this time the lower teeth were also straightened.

Case studies

This lady was unhappy with an instanding incisor, that gave the impression she had a missing tooth. As a result she was very embarrassed to smile. She wore a QST fixed brace for five months. She now loves to smile and show off her straight teeth.

The parents of this young boy were concerned about how the upper front teeth were biting the wrong way around. He did not want to wear a fixed brace. Therefore, a removable QST brace was worn for three months to correct this problem .
